Dallas isd compliance

In June 2019, the Texas State Assembly passed the House Bill 3834, a bill requiring local and state government employees, district trustees and contractors, to complete the Department of Information Resources (DIR) approved cybersecurity awareness training. Dallas ISD has established formal training to meet the state mandate. The exercise is now available at Cornerstone. Under HB 3834, staff and board members with access to local government computers are required to take cybersecurity awareness training. Exceptions include guardians, maintenance staff and facilities, bus drivers, insect center drivers and campus-based food service workers whose job responsibilities do not include the use of computers. If you're not sure if you need to complete cybersecurity training, check with your supervisor. Cybersecurity training consists of seven independent modules that last between five to seven minutes each. Modules can be taken in any order and a few days. Each module has a set of questions to test your knowledge. This course focuses on shaping habits that guarantee information and teaches users best practices to identify and address security threats.
